RESEARCH INTERESTS

My research interests are primarily in machine learning based on large-scale optimization and high-dimensional statistics. I am also interested in online or distributed algorithms for those areas.

EDUCATION

The University of Texas at Austin 2011 - 2016 (Expected)

Ph.D., Electrical & Computer Engineering

- Advisors : Prof. Sujay Sanghavi and Prof. Constantine Caramanis
- Current GPA : 4.0/4.0

Korea Advanced Institute of Science and Technology

M.S., Electrical Engineering

- Thesis : Performance-Complexity Tradeoffs of Rateless Codes
- Advisor : Prof. Sae-Young Chung

B.S., Electrical Engineering (Magna Cum Laude)

- Minor in Computer Science

RESEARCH EXPERIENCE

Facebook, Inc.

Semantic embeddings of topics in the word vector space

- Designed an algorithm based on Word2Vec which embeds topics into the word vector space
- Implemented a pipeline which constructs training text corpora using Python, Java, and Hive/SQL, and developed the algorithm and its unit tester in C/C++.

The University of Texas at Austin

Collaborative ranking from pairwise preferences

- Proposed algorithms for ranking multiple items for each of multiple users from given pairwise preferences.
- Implemented parallel algorithms on a multi-core machine.

Learning unions of subspaces (a.k.a. Subspace clustering)

- Developed algorithms to recover unions of subspaces from unlabeled points.
- Derived statistical guarantee for exact clustering with conditions weaker than state-of-the-art results.
- Showed competitive practical performance on motion segmentation with much lower computational cost.

Samsung Advanced Institute of Technology

Mobile indoor localization systems

- Designed algorithms to estimate indoor locations with limited infrastructure.
- Developed a testbed to demonstrate the localization algorithms.

Work Experience

Facebook, Inc. July 2015 - October 2015
Sofeware Engineering Intern
- Search/Content Ranking Team
- Project: Semantic embeddings of topics in the word vector space

Samsung Advanced Institute of Technology August 2008 - July 2011
Research Staff
- Project : Mobile Indoor Localization Systems

COURSES

Math/OR/Stat - Real Analysis, Theory of Probability, Functional Analysis, Numerical Linear Algebra, Linear Programming, Convex Optimization, Statistical Modelling

EECS - Probability and Stochastic Processes, Advanced Probability, Randomized Algorithms, Machine Learning, Large-scale Learning, Sparsity/Structure/Algorithms, Scalable Machine Learning, Information Theory, Coding Theory, Communication Systems.

HONORS & AWARDS

KAIST Governmental Fellowship
Bronze medal, Korean Olympiad in Informatics
Bronze medal, Korean Science Olympiad
