RESEARCH INTERESTS

My research interests are primarily in large-scale optimization and high-dimensional statistics with focus on machine learning. I am also interested in online or distributed algorithms for those areas.

EDUCATION

The University of Texas at Austin

August 2011 - Present

Ph.D., Electrical & Computer Engineering

• Advisors: Prof. Constantine Caramanis and Prof. Sujay Sanghavi

• Current GPA: 4.0/4.0

Korea Advanced Institute of Science and Technology

August 2008

M.S., Electrical Engineering

• Thesis : Performance-Complexity Tradeoffs of Rateless Codes

• Advisor : Sae-Young Chung

• GPA: 4.08/4.3

Korea Advanced Institute of Science and Technology

August 2005

B.S., Electrical Engineering (Magna Cum Laude)

• Minor in Computer Science

• GPA: 3.71/4.3

RESEARCH EXPERIENCE

The University of Texas at Austin

Subspace clustering/Learning unions of subspaces

- Developed algorithms to recover unions of subspaces from unlabeled points.
- Derived statistical guarantee for exact clustering with conditions weaker than state-of-the-art results.
- Showed competitive practical performance with much lower computational cost.

Collaborative ranking from pairwise preferences

- Proposed algorithms for ranking multiple items for each of multiple users from given pairwise preferences.
- Implemented parallel algorithms on a multi-core machine.

Samsung Advanced Institute of Technology

Mobile indoor localization systems

- Designed algorithms to estimate indoor locations with limited infrastructure.
- Developed a testbed to demonstrate the localization algorithms.

Korea Advanced Institute of Science and Technology

Rateless codes for wireless communication systems

- Designed a rateless code with improved computational complexity.

Courses

Math/OR/Stat - Real Analysis, Theory of Probability, Functional Analysis, Numerical Linear Algebra, Linear Programming, Convex Optimization, Statistical Modelling

EECS - Probability and Stochastic Processes, Advanced Probability, Randomized Algorithms, Machine Learning, Large-scale Learning, Information Theory, Coding Theory, Communication Systems, Sparsity/Structure/Algorithms, Scalable Machine Learning

Honors & Awards

KAIST Governmental Fellowship

Bronze medal, Korean Olympiad in Informatics Bronze medal, Korean Science Olympiad

TEACHING EXPERIENCE

The University of Texas at Austin

Teaching Assistant

• Large-scale Optimization

Work Experience

Samsung Advanced Institute of Technology

August 2008 - July 2011

Research Staff

• Project : Mobile Indoor Localization Systems

PATENTS
